In the history of Western aesthetics, the subject that received attention ranged from natural objects and
phenomena, built structures, utilitarian objects and human actions, to what is regarded as the fine arts.
However, beginning with the 19 th century, the discourse has become increasingly focused on the fine arts. This
narrowing occurred despite the prominence of the aesthetic attitude theory in modern aesthetics, according to which there is virtually no to what can become a source of aesthetic experience.

Hibiscus is a genus of flowering plants in the mallow family, Halvaceal. It is quite large, containing several hundred species that are native to warm temperate sub-tropical and tropical regions throughout the world. Member species are often noted for their showy flowers and are commonly known as hibiscus sorrel and flor de Jamaica, on less widely known as rose mallow. (1) _______. The leaves are alternate, ovate to lanceolate, often with a toothed or lobed margin. The flowers are large, conspicuous, trumpet shaped with five on more petals, colour from white to pink, red, orange, purple or yellow and from 4-18 cm broad. Flower colour in certain species, such as H.mutabilis and H.tiliaceus changes with age. The fruit is a dry five lobed capsule, containing several seeds in each lobe, which are released, when the capsule splits open at maturity. It is of white and red colour. (2) _____.

- A. The genus includes both, annual and perennial herbaceous plants, as wells as woody shrubs and small trees.
- B. Tea is made from the Hibiscus flower, which is called Bissap in West Africa and Karkade in Egypt.
- C. Hibiscus is an example of a complete flower.
- D. These flowers attract humming birds and butterflies.

None Response Time: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0.25

Study the given inference that is followed by some paragraphs. You have to find the paragraph(s) from which it is inferred and select the most appropriate option.

Inference: A plant that causes itching

1. Because it is a legume, the plant can store nitrogen and add nutrients to the soil. The beans are eaten and are

commonly referred to as "Benguk" in Indonesia, particularly Java. Benguktempe or "tempeBenguk" is a food made

from fermenting the beans that is similar to tempeh.

2. It has hair on both sides of the leaf. The leaflets have two- to three-millimetre-long stems. There are additional

adjacent leaves that are approximately 5 mm long. In the tropics, it is a common fodder plant. As a result, animals are

fed the entire plant as silage, which is dried hay on dried seeds. The dried beans contain 20-35% crude protein, 35-40%

crude fibre, and 11-23% crude protein in its silage.

3. It is a tropical legume that grows in Africa, India, and the Caribbean. It is also known as velvet bean on cowitch and

by other common names. The plant is well-known for its severe itching. It makes contact, particularly with the seed

pods and young foliage. It is useful in horticulture and agriculture, and it has a number of medicinal properties.

Options:

1. * Only 1 and 2

2. V Only 2 and 3

3. **3** 1, 2 and 3

4. * Only 1

Study the given inference that is followed by some paragraphs. You have to find the paragraph(s) from which it is inferred and select the most appropriate option.

Inference: E-waste

1. Even the basic law on urban waste, the Municipal Solid Wastes (Management and Handling) Rules, has been met

with indifference by states, which continue to burn garbage or dump it in lakes. It should be possible to effectively

implement both sets of rules if the emphasis is placed on waste segregation at the source and material recovery. The

emphasis on extended producer responsibility is a welcome aspect of the new e-waste. To put it another way,

manufacturers are in charge of disposing of obsolete goods. They must ensure that scrap sellers receive some kind of

financial incentive for this provision to be effective.

2. Dismantling activities introduce dust particles laden with flame retardants and heavy metals into the atmosphere,

resulting in atmospheric pollution. These particles can either redeposit (wet or dry deposition) in close proximity to the

emission source or, depending on their size, travel a great distance.

3. One of today's greatest obstacles is recycling e-waste. E-waste and the dangers it poses have become more apparent

over time in a setting where globalisation and information technology are expanding at a rate that was previously

unimaginable. As a result, it is imperative that immediate attention be paid to this issue.

Question Numbers: (76 to 80)

Read the given passage and answer the questions that follow.

The popular saying is, 'Learn to accept the things you cannot change.' Or, ignore. Imagine you find yourself in the middle of a ferocious argument between two colleagues. What would you do - take sides and incur the wrath of the other? Demand that they pipe down and join in the confusion? Or simply walk away, ignoring them? The safest is perhaps to ignore, but that could be mistaken for indifference, disinterest or even apathy. Yet the answer to a lot of sticky situations in life could possibly be to ignore it for the moment; to let things settle down and find their own level. That way, the heat and the dust settle down, and better sense would prevail. To ignore something is not the same as not caring; it could even mean that you care so much that you have decided to ignore it so that it does not get worse. That is to say, to ignore responsibly — but it does not mean that you can ignore your responsibility when you are required to be responsible. Is there a way to ignore someone or something without causing offence? To ignore is a passive response (rather, a nonresponse); there is little chance of sparking a conflict. Sometimes, silence is truly golden, for it creates the space for reflection and for calming down. Agitation only fuels further agitation and misunderstanding, whereas remaining silent could have the opposite effect, of easing tension and bringing in the much-needed calm. A lot of tricky situations in life tend to sort themselves out if only we had held our tongue and kept the peace.

मनुष्यों की पोशाकें उन्हें विभिन्न श्रेणियों में बाँट देती हैं। प्रायः पोशाक ही समाज में मनुष्य का अधिकार और उसका दर्जा निश्चित करती है। वह हमारे लिए अनेक बंद दरवाजे खोल देती है, परंतु कभी ऐसी भी परिस्थिति आ जाती है कि हम जरा नीचे झुककर समाज की निचली श्रेणियों की अनुभूति को समझना चाहते हैं। उस समय यह पोशाक ही बंधन और अड़चन बन जाती है। जैसे वायु की लहरें कटी हुई पतंग को सहसा भूमि पर नहीं गिर जाने देतीं, उसी तरह खास परिस्थितियों में हमारी पोशाक हमें झुक सकने से रोके रहती है।
