Question Label : Comprehension

Read the following passage and answer the questions given after it.

Struggling to survive, Indian airline companies could see the steepest hike in jet fuel prices in recent times on Monday with oil companies informing them of an over-7% increase for October rates. Airline sources say aviation turbine fuel (ATF) will cost about ₹ 74,530 per kilolitre in Delhi.

This level was last seen in March 2014 and is just short of the all-time high of ₹ 77,089 (in Delhi) in October 2013. However, the impact now will be double as the rupee-dollar exchange rate is at almost ₹ 73 (it used to be ₹ 61 at the start of 2014).

"The twin impact — 7.3% hike in ATF and crashing rupee — is going to be devastating for us as most costs of airlines (like aircraft lease rentals and maintenance contracts) are in dollars. Oil companies have informed us of the steepest hike in recent times from Monday. Jet fuel prices in India for domestic flights are already the highest globally," said an airline official.

An airline like Air India expects ATF costs to rise by ₹ 65 crore this month. AI, which has an annual fuel bill of ₹ 8,500 crore, has about 15% domestic market share. What this could lead to now, say sources, is higher spot fares in the festive season. IndiGo had introduced a fuel surcharge on domestic flights of ₹ 200 and ₹ 400 for flights on sectors below and over 1,000 km respectively, from May 30, 2018. At that time, ATF was ₹ 70,000 per kl in Delhi and the exchange rate was at 67.5. "With ATF at ₹ 74,500 in Delhi and the dollar at ₹ 73, airlines levying fuel surcharge could hike the same and others will start levying the same if they want to avoid a Kingfisher-like fate," said an official.

Airlines are fuming as they do not understand why the government did not augment airport infrastructure at choked hubs like Delhi and Mumbai, which needed a second airport five years back. "We waste tonnes of fuel hovering in places like these. The government was just happy basking in the glory of India being the fastest-growing aviation market but did nothing about airport infrastructure. We should have had new and bigger airports getting inaugurated by now instead of just stonelaying ceremonies being held," said a senior pilot.

Which statement is NOT true according to the passage?

#### **Options:**

- New and bigger airports are not ready in the country.
- Airlines waste tons of fuel hovering over the airports.
- Airlines need to hike the fuel surcharge with the rising costs.

Question Id: 162653483 Question Type: COMPREHENSION Sub Question Shuffling Allowed: Yes Group Comprehension

**Questions: No** 

Question Numbers: (76 to 80)

Question Label: Comprehension

Read the following passage and answer the questions given after it.

Struggling to survive, Indian airline companies could see the steepest hike in jet fuel prices in recent times on Monday with oil companies informing them of an over-7% increase for October rates. Airline sources say aviation turbine fuel (ATF) will cost about ₹ 74,530 per kilolitre in Delhi.

This level was last seen in March 2014 and is just short of the all-time high of ₹ 77,089 (in Delhi) in October 2013. However, the impact now will be double as the rupee-dollar exchange rate is at almost ₹ 73 (it used to be ₹ 61 at the start of 2014).

"The twin impact — 7.3% hike in ATF and crashing rupee — is going to be devastating for us as most costs of airlines (like aircraft lease rentals and maintenance contracts) are in dollars. Oil companies have informed us of the steepest hike in recent times from Monday. Jet fuel prices in India for domestic flights are already the highest globally," said an airline official.

An airline like Air India expects ATF costs to rise by ₹ 65 crore this month. AI, which has an annual fuel bill of ₹ 8,500 crore, has about 15% domestic market share. What this could lead to now, say sources, is higher spot fares in the festive season. IndiGo had introduced a fuel surcharge on domestic flights of ₹ 200 and ₹ 400 for flights on sectors below and over 1,000 km respectively, from May 30, 2018. At that time, ATF was ₹ 70,000 per kl in Delhi and the exchange rate was at 67.5. "With ATF at ₹ 74,500 in Delhi and the dollar at ₹ 73, airlines levying fuel surcharge could hike the same and others will start levying the same if they want to avoid a Kingfisher-like fate," said an official.

Airlines are fuming as they do not understand why the government did not augment airport infrastructure at choked hubs like Delhi and Mumbai, which needed a second airport five years back. "We waste tonnes of fuel hovering in places like these. The government was just happy basking in the glory of India being the fastest-growing aviation market but did nothing about airport infrastructure. We should have had new and bigger airports getting inaugurated by now instead of just stonelaying ceremonies being held," said a senior pilot.
